Evergreen Engineering is a full-service consulting engineering company, with all engineering disciplines, serving the wood products industry since 1985. Evergreen has extensive experience with wood and fiber products and manufacturing plants, ranging from numerous custom retrofit projects to complete greenfield plants. We offer full technical support through construction, start-up, and commissioning.

Evergreen can supply complete design for pellet plants, from woodyards and raw material infeed systems to screening, reducing, drying, conveying, pelletizing, and packaging. Our designs include heat energy and environmental systems.

We have experience with:

- Raw material handling
 - Receiving/stacking/reclaiming
 - Screens, hogs
 - Magnets
 - Conveyors
 - Wood/ag residuals
- Dryers
 - Rotary drum
 - Heat/energy systems
 - Ducting
 - Emissions controls
 - Bag filters/ESP/WESP
 - RTO, RCO
 - Biofilters
- Pellet plant process equipment
 - Final grinding/screening
 - Pellet machines/pellet cooling
 - Storage & bagging
- Utility requirements
 - Electrical/air/water/gas/fire systems
