Evergreen is a full-service consulting engineering company, with all engineering disciplines, serving the wood products industry since 1985. Evergreen has extensive experience with structural, engineered, and composite wood plants, ranging from numerous custom retrofit projects to complete greenfield plants. We have a highly qualified technical staff, including some of the leading experts in the industry, with hands-on operational experience in engineered wood products and panel plants as well as innovative process expertise.

We have extensive experience utilizing wood residuals. We can supply consulting engineering for every step of the wood residual process. We have experience using wood residuals for all wood processes, including MDF, particleboard, OSB, wood pellets, carbon and wood briquettes, biomass energy plants, wood plastic composites, and other wood processing. Evergreen excels when it comes to engineering raw material handling, screening, storage, converting, and cleaning systems.

Evergreen offers the best possible range of knowledge and capabilities to address retrofit, expansion, and new construction for wood processing projects.

We welcome your questions, and would be pleased to help with your new or existing facilities.
