

Project Examples

Eagle Valley Clean Energy

- Complete Engineering for woodyard
- Log handling
- Wood chipping
- Chip Storage
- Construction Management

Pope & Talbot, Inc.

- Wood chip reclaim system
- Woodyard study
- Rail car unloading system
- Wood chip stacking and reclaim

Kimberly-Clark Nova Scotia

- Complete chip thickness screening system – 3-line system
- Woodyard modification

Weyerhaeuser Paper Company

- Chip thickness screening – 3-line system

Inland Paper and Packaging

- Chip thickness screening study
- Chip unloading, stacking, and reclaim study

Sappi Fine Paper

- Fines screening – 3-line system
- Woodyard study

Mead Paper Company

- Chip thickness screening – 4-line system

Cascade Pacific Pulp

- Chip-sizing system
- Chip truck unloading with dust collection

Boise Cascade Corporation

- Material handling system (wood chips)
- Chip thickness screening – 1-line system
- Primary disc screen system

Scott Paper Company

- Chip thickness screening – 4-line system

Louisiana-Pacific Corporation

- Woodyard study
- Chip screening study

Fort James Corporation

- VSF screening modification
- Woodyard study
- Woodyard dust containment

International Paper Company

- Chip unloading truck dump (drive-thru)

Potlatch Corporation/Clearwater

- Fines removal for 150 BDT/hr system
- Fines thickness screening and chip sizing for 150 BDT/hr system
- Sawdust blow line to mechanical continuous digester
